SKILLS

Visualizations: Power BI, Tableau

Languages: Python, R, SQL, JavaScript (React), Solidity, HTML/CSS

ML: Supervised, Unsupervised, SVM, Ensemble, Clustering

Technologies & Tools: Android, Blockchain, Ethereum, Smart Contracts, Web3.js, MySQL

WORK EXPERIENCE

John Keells Properties

October 2025 - Present

Data Analyst

- Automated weekly manual reporting by building a Power BI dashboard that updates daily, giving marketing and sales teams instant access to insights.
- Created an interactive dashboard where clicking any property, date, or advisor shows real-time relationships across leads, statuses, and performance data.
- Streamlined multiple manual data processes across the marketing department, reducing repetitive work and freeing up team focus on strategic tasks.

EDUCATION

Cardiff Metropolitan University, UK

Nov 2025 – Present

- BSc (Hons) Data Science

Cardiff Metropolitan University, UK

Nov 2023 – Nov 2025

- (HD) in Computing & Software Engineering

Central college Piliyandala, Sri Lanka

2020

- G.C.E A/Ls 2020 - 2Cs & 1S (Combined Mathematics, Physics, Chemistry)

PROJECT WORK

Leads Analytics Dashboard - John Keells Properties (2026): Automated weekly manual reporting with a 6-page Power BI dashboard connected to 7 data sources for real-time lead tracking. After extensive data cleaning, gave marketing and sales teams instant access to lead types, statuses, and advisor performance across all properties. Enabled independent data exploration with one-click filtering and drill-through, eliminating delays and speeding up decisions. Power BI, SQL, Data Architecture

Movie Recommender System (2025): Built an interactive movie recommendation engine using collaborative filtering with Streamlit. Users select a movie and get 5 similar recommendations with posters fetched live from TMDB API. Implemented content-based filtering using pre-computed similarity matrices. Python, Streamlit, Scikit-learn, Pandas, TMDB API
